- International
 USA

- Raymarine chart plotters have background cartography only, which cover certain areas of the world, to ensure the correct version of plotter is fitted please indicate the area of use N.E.C.
Plotter:
 European version
 Rest of world
 USA version

AIRCONDITIONING

- Reverse cycle Airconditioning/heating (24,000 BTU) suitable for temperatures to 40°C (tropical) £23,317.00
supplying saloon, forward & aft cabins and bathroom
Recommended generator either 4 kW or 6 kW
- Electrosea Electrostrainer fitted on air conditioning sea water inlet. £7,221.00
System is an all-in-one biofouling prevention and straining device that prevents marine growth on sea water pipes and reduces fouling of the air conditioning system impeller.
- Dometic Breathe Ioniser air purification system to all A/C outlets. £670.00
(Note: Only available if optional air conditioning is selected)

HEATING / DEMIST

- Windscreen demist system using warm air heater powered from calorifier £2,221.00
- Eberspacher D4 Airtronic boat heating £12,810.00

inkl. 8.1% MWST - ex Plymouth

(includes special air silencer on heater air inlet and outlets in all cabins, saloon & bathroom). Eberspacher heater outlet point in cockpit area with diverter valve

MOSQUITO SCREENS

- Mosquito screens for portlights £789.00

HOLDING TANK / TOILETS

The standard black water tank (approx. 20 gallons / 90 litres) includes a remote tank contents gauge. The toilet can discharge directly into the black water tank but also has the ability to discharge directly overboard via a Y valve fitted in the discharge line. The black water tank has both dockside and manual overboard discharge facilities fitted as standard

As standard, sinks and showers will discharge overboard

- Electric discharge £4,438.00
In addition to the manual overboard and dockside discharge facilities an electric overboard discharge system is fitted. The electric overboard discharge system incorporates an electric valve with timer. When the pump is turned on a time delay allows the electric valve to open before the pump starts. When the pump is switched off the valve closes. This means the through hull seacock does not need to be opened/closed every time the pump is switched on. The through hull seacock is itself fitted with a micro switch which prevents operation of the pump when it is closed. The electric valve has a manual override facility

EXTERIOR UPHOLSTERY / CANVAS / COVERS

The colour selections below have been carefully selected to match the specified canopy styling blade
